The President's Message

Well, what a winter we've had. I think that I have spent more time shoveling snow and hauling in the wood for the wood stove in my shop than actually working with wood. Although, technically speaking, splitting and stacking could be considered woodworking.

Since early January, I've been out of my shop 2 or 3 days a week working at a friend's shop on a neat restoration project. He is an antiques dealer and, a few years ago, he discovered a ship's figurehead at an auction. It is a carving of an Indian and his hunting dog.

When I first saw it, it looked more like a pile of driftwood than anything else. There were pieces missing and pieces broken and a lot of what was there was rotted badly. Had the decision been mine to make, I would never have bought the thing. But, my friend, being infinitely more wise than I, bought it.

It turned out to be the figurehead off the ship "WILLIAM PENN", circa 1790 and it was almost certainly carved by one of the 18th century's premier sculptors, William Rush. What a find! My job is to remove the rotten stuff without touching the original visible surface and grafting in new wood to get it ready for carving. It is quite a challenging project.

The other 2 days a week (plus weekends), I have renewed my interest in musical instrument making. This winter, I made two guitars. This work is very finicky and intricate. Consequently, it is hard to get out of them financially, what I invest in them. But, coming up with a new design and making two instruments has been a passionate compulsion for me this winter. However, my wife is very glad they are finished!

The miserable weather was also responsible for the canceled slide lecture that I was scheduled to give at the Art Center at U.N.H. Even though it was snowing hard, I decided to strike out for Durham. However, my van decided to breakdown on I-89 in the middle of the blizzard.

We eventually made it to Concord where some temporary surgery was performed, enough to get us back home anyway. I was very frustrated and disappointed to say the least.

But now Spring has sprung and a woodworker's thoughts turn to the Guild meeting at David Lamb's shop! David's demonstration of carving a ball and claw foot is sure to be a fun day. Don't miss it!

I want to thank Greg Elder and the Dartmouth Student Workshops for the use of their facility for our last demonstration. I also want to thank Peter Bloch for a well presented program. Despite the idiosyncrasies of an unfamiliar lathe set up, Peter's presentation was professional and thorough and was very well received by all in attendance.

While on the subject of demonstrations, I think our meetings are a tremendous resource for all skill levels of our membership. I want to be sure to have a backlog of demos that would be interesting to you. To that end, I would like to hear from you. If you have any ideas for upcoming demonstration subject matter, please drop me a note or call me. Let's keep the momentum flowing.

John Skews and I are currently working on this year's Annual Juried Show. The juror will be Peter Korn, formerly the program director for Colorado's Anderson Ranch Arts Center. Peter has written a new book called "Working with Wood: The Basics of Craftsmanship" due to be released by the Taunton Press (publishers of Fine Woodworking) this year.

Peter is an award winning Craftsman as well as an accomplished instructor. He has opened the School for American Craftsmen - Center for Furniture Craftsmanship in Hope, Maine. His unique blend of skills and talents made him an obvious choice for jurying past exhibits of the Guild of Colorado Woodworkers and we are privileged to have Peter as Juror of our annual show.
Green wood turns easily, however it is flexible. Therefore, after rough turning the whole bowl to a wall thickness of about 3/8 inch, he final turns and sands one third of the wall at a time starting with the uppermost third.
wood turning and sources for equipment, supplies, publications and instruction.
Copies of this sheet may be obtained by sending a self-addressed and stamped envelope to him at 2 Otterville Road, New London, NH 03257.

Peter is very well known to New Hampshire residents and visitors. He sells his work mostly through the League Shops and the Annual League Fair, where he is a tenured booth holder. He is currently an alternate on the League of New Hampshire Craftsmen Wood Jury. He also gives one workshops on turning in his own shop for beginner and intermediate students.

He has been a self-taught, full time woodworker for 12 years and has been doing turnings for seven years. He produces both small scale production multiples and one of a kind pieces using a small Myford and a large, custom built D/J lathe and a large Inca bandsaw.

An Interview With David Lamb
Host of the Spring meeting
O.S.: David, please tell us how you got started.
David: I got started in this business in 1972, when I was offered an apprenticeship with Alejandro de la Cruz. Mr. de la Cruz was an old world master, trained in Madrid under two masters in the 1930's. I had just moved to the Canterbury Shaker Village with my parents (they ran the museum) and Mr. de la Cruz' shop was at the foot of the hill.

O.S.: What was the apprenticeship under an old master like?
David: I was 14 then and still in school. I would come to work for the master after school and on weekends. As an apprentice, I did not work directly on his furniture. I did assist him with the assembly of his work and with restoration jobs.

Most of my time was spent at the bench, cutting joints, and cutting joints, and cutting joints and edge joining boards until there was nothing left to join. This repetitious work was the foundation for patience, attention to detail, and becoming so familiar with what you are doing that all the motions become second nature.

This "old world" approach to teaching is very solid ... very similar to the "Karate Kid" movie with the "wax on, wax off" type of training. The parallels are amazing. It's the philosophy that to do your best work, you must practice, practice, practice, and work fast but don't cut corners because they will come back to haunt you or affect your reputation. It goes deeper than this but that is another story for another time.

O.S.; What did you do after your apprenticeship?
David: In 1977, I entered the Program in Artisanry at Boston University under our own Jere Osgood and also Alphonse Mattia. This school revealed to me many new approaches to wood working and design, and was very important in my growth as a craftsman.

After B.U., I operated a shop at Shaker Village until 1986. Then, I bought Mr. de la Cruz' home and shop and have been here ever since.

O.S.: You have worked here for many years, are you satisfied with your shop?
David: It is the biggest shop I ever had, but the 20x40 foot building is getting very tight. Especially, when I began to collect 19th century machinery, line shafting and machine shop tools (thanks a lot, Jon Siegel). My special interest is woodworking machinery made in N.H. by John A. White ... as if no one knows. It's a good thing that I love my work.

O.S.: Thank you, David for this interesting insight into your apprenticeship. Many of us envy you the experience, although we know that it was a lot of hard work and not all fun. It seems too bad that there isn't a similar opportunity for anyone really interested in a woodworking career today.

Conventional Wisdom And Old Myths
Jon Siegel
A February 10, 1993 article in the Health section of the New York Times reports that "wooden cutting boards kill food poisoning bacteria that survive nicely on the plastic cutting boards that have been widely promoted for years as safer than wood."

"The scientists ... found that when boards were purposely contaminated with organisms like Samonella, Listeria and Escherichia coli that are common causes of food poisoning, 99.9% of the bacteria died off within three minutes on the wooden boards, while none died on the plastic ones."

"When contaminated boards were left unwashed overnight at room temperature, bacterial counts increased on the plastic, but none of the organisms could be recovered from the wooden boards the next morning."

The researchers at the University of Wisconsin do not know how or why wood kills bacteria, but they say that after testing many different kinds of wood and plastic that these surprising results were conclusive. However, they "cautioned against being 'sloppy about safety' and warned cooks to be sure to wash off cutting surfaces after cutting meat, chicken or fish, whether the surface used is wood or plastic."
Are Your Dues Paid?

Our treasurer, Teri Browning, reminds everyone again that the annual dues of $15 per member were due and payable on September 1, 1992. Our year runs from Sept. 1 to Sept. 1.

The Guild policy on dues is that anyone not paying their dues by January 31, 1993 will be dropped from the mailing list.

An unpaid dues notice is being mailed with this issue of the Old Saw. Anyone receiving this notice will be dropped from the mailing list if their dues are not paid by the next meeting. We really don't want to do that, so please get your dues to Teri.

Please send your dues to Teri Browning at:

Box 131, Rt. 25 at 25A
Wentworth, NH 03282

Canterbury Shaker Village Wood Day
Saturday, May 8, 1993

Dave Emerson

It's no mystery that May 8 should be the best Wood Day yet at Canterbury Shaker Village. But, we do have one mystery that may or may not be solved by Wood Day. Is the 28 foot, wooden, Johnson motor launch, coming to Wood Day, the actual boat that the Canterbury Shakers used from 1927 to 1938 to get to their camp on Lake Winnipesauke? It appears to be identical! Lou Yelsin really got something started.

In addition to the Johnson motor launch which HiGloss Boatworks of Rockport is in the process of restoring, we have a reproduction of a classic 24 1/2 foot E racer and a 1/4 scale dory to keep Lou's lapstrake canoe company. I think I know all that's coming to Wood Day, but I generally get a surprise or two (That's plenty). The furniture tent has plenty of furniture, plus boats and a good showing of antique tool dealers.

The Carpenter Shop Gallery design team will finish on time and the brochures will arrive on time. When you read this, everything will be ready. With the opening of the gallery, Wood Day, already famous for fine demonstrations of traditional woodworking skills will become famous for fine individually crafted furniture.

Wood Day will be a great party. I can smell the barbecued chicken already. See you there.

Joint Turned Object/Pottery Show?
Volunteer Coordinator Needed

The Potter's Guild is interested in exploring the possibility of a joint show with the wood turners of our Guild. A volunteer is needed to determine the interest among our members and to coordinate the effort with the Potter's Guild if there is enough interest to warrant it. Any turner interested in such a show is asked to contact either Terry
Moore (863-4795) or John Skewes (778-7360) for further information.

Turning Interest Group?
Volunteer Coordinator Needed
Are you interested in forming a Wood Turning Interest Group? From the large and enthusiastic turnout at the Dartmouth meeting, it seems as though there are enough turners among our membership that it may be time to form a special interest group on wood turning.

Such a group would put on special meetings and activities which are primarily of interest to turners although anyone would be welcome to participate. A volunteer is needed to determine the interest among our members and to coordinate the effort if there is enough interest to warrant it.

Any turner interested in such a group is asked to contact either Terry Moore (863-4795) or John Skewes (778-7360) for further information.

Plans For Annual Juried Exhibit Underway
John Skewes

As many of you know, this year our Juried exhibit is being hosted by the N.W. Barrett Gallery, Market Street in Portsmouth, N.H. A call for entries will be forth coming but we thought it might be helpful if you knew some of the details ahead of time.

The host will be the N.W. Barrett Gallery, Portsmouth N.H., in the Upstairs Gallery and the juror will be Peter Korn founder of The Center for Furniture Craftsmanship, Camden Me. (see The President's Report).

The show will formally open on Sept. 11, from 3-5 p.m. and will run through Oct. 23 1993.

Eligibility requirements are, any work by a current member of the GNHWW not previously shown more than once in this state.

Jury will be by slide or photo. Work not yet photographed or not as yet made must be represented by high quality drawings and supported by photos of like work. Notice of rejected work will be accompanied by a brief explanation.

Jury fee is $15.
Gallery commission will be 40%.
Delivery date: Monday, Sept. 6, 1993, all day .

We are hoping that on delivery day you will hang around for a while after your piece makes the trip up the stairs so that you can help another. If you think you can help us in anyway or would like to be more involved with the show please contact John Skewes or Terry Moore.

Portsmouth is a busy town in the fall and the Barrett Gallery has a good reputation and a loyal following. I encourage all members to stop by and see the Upper Gallery, it is very nice. I hope that, once again, we can put together a show that truly reflects the talents of our members. Let's challenge ourselves and stagger the public with a memorable show.

Guild Computer Users Group Meeting
June 8, 1993

The next meeting of the Guild Computer Users Group will be held June 8th from 7:00 p.m. to 9:00 p.m. at Roy Noyes shop in Chester.

The topic of the evening will be Relational Databases. These are the programs that allow you to connect one database to another, i.e. inventory database, sales database and customer information database to produce a report that hopefully has a calming effect. They are extremely customizable and powerful programs but remain a mystery to most of us. Please, attend the meeting and see what they can do for you.

As always, our first hour is devoted to techno-chatter and troubleshooting. Experts and non-experts are welcome, bring a snack. C.U.G members will receive a reminder just before the meeting. To get on the C.U.G. member list write or call Roy Noyes, Editor, The Old Saw.

World Class Craft Fair, June 12, 1993
The Orford Lions Club is holding what they describe as a World Class Craft Fair/Auction from 9:00 AM to 5:00 PM on Saturday, June 12, 1993 on the Orford Common to benefit their Scholarship Fund. Rain date is Sunday, June 13. Woodworkers entries are invited. Booth space is $10.00. For reservations contact Virgil F. Mack (603) 353-4136.

American Association of Woodturners
Annual Symposium, June 25-27, 1993
Peter Bloch

The American Association of Woodturners will hold its 7th Annual Symposium in Purchase, NY in June 1993. This is an opportunity that should not be missed by anyone interested in wood turning. Previous symposia have been held in Tennessee, Texas and Utah and this is the first one that has been scheduled in the Northeast. We may have to wait 5 - 6 years 'til it comes our way again.

This is an event that I can recommend without any hesitation ... and I know from firsthand experience, having journeyed to the past two symposia in Dallas and Provo, Utah.

Woodworker's Calendar
May 8, 1993
Wood Day at Canterbury Shaker Village, Canterbury, NH. Contact: Dave Emerson -- Days 783-9511, Home 783-4403.
May 22, 1993
